

# PUFF INNER PACK

The unique properties of puff materials allow for the finished good packaging height to be reduced by as much as 40% through the elimination of costly protective caps. Complex fixture-in-puff packaging saddles can be replaced by an inner pack\*.

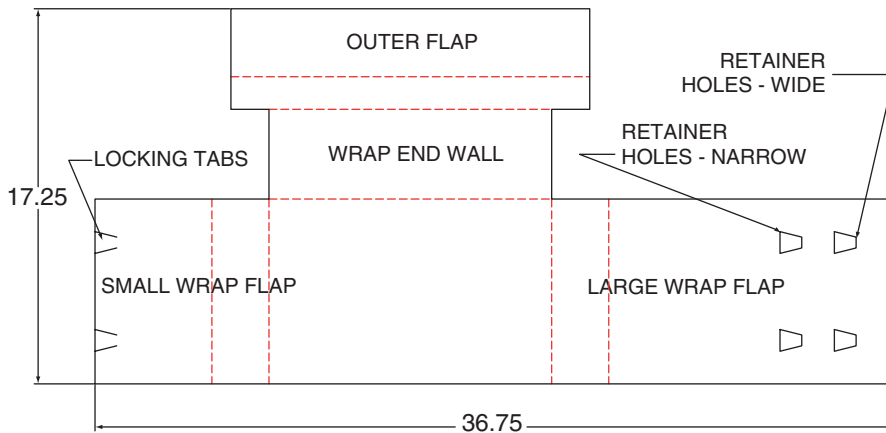

- Convenient compact packaging
- Reduces shipping cost
- No cumbersome packaging saddles

The puff inner packs are made in sets of left and right folders. Test fold one set to determine the left and right part as shown in the following instructions. Refer to the following Diagrams for the descriptions used in these instructions.

## Puff Inner Pack Instructions Diagram 1 - 4 Lamp

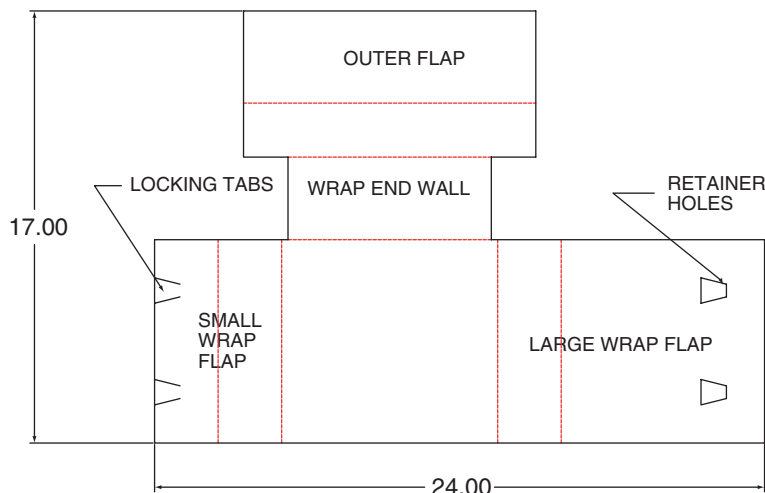

TOP VIEW OF RIGHT INNER PACK FOLDER FOR 4 LAMP PUFF

**Note** that the 4 lamp inner pack folder has 2 sets of retainer holes in the large wrap flap. These allow accommodation for different width fixtures which are available today. Use the holes that are the most appropriate for the width of the wrap fixture you are packing into the puff diffuser.

**\*Note:** Inner pack available as an adder contact A.L.P. Lighting Components, Inc. for more information.

# INSTRUCTIONS

**Step 1:** Open the Puff Outer Carton.

**Step 2:** Locate the outer flap and orient the inner pack folder approximately as shown.

**Step 3:** Place the outer flap of the inner pack between the end of the puff diffuser & the end of the carton.

**Step 4:** Fold the large wrap flap & the small wrap flap in towards the center of the puff and fold the wrap section of the inner pack into the puff diffuser.

**Step 5:** The wrap end wall of the inner pack should be in a vertical orientation.

**Step 6:** Both sides must be packed in tandem when inserting the wrap fixture - be sure to insert an inner pack at each end before inserting the wrap fixture.

**Step 7:** Open the small and large wrap flaps so the wrap fixture can be inserted into the inner pack folder.

**Step 8:** Insert the puff wrap into the inner pack folder and position it flat on the bottom of the inner pack folder.

**Step 9:** Fold the large wrap flap onto the wrap fixture & cover that with the small wrap flap. Position the flaps securely as possible.

**Step 10:** Push the wrap flap retainer locking tabs found on the small wrap flap into the matching retainer holes in the large wrap flap.

**Step 11:** Re-close the puff (outer) carton & secure with tape, or other appropriate means.
