

RDIAC HT 2x2, 2x4

Recessed Direct / Indirect

Retrofit fixture without lifting, measuring or cutting!

UARDIACHT

End view showing reflector configuration and lampholder location

Elegant Design: The RDIAC HT provides the look and feel of a deep RDI luminaire — subtle soft indirect elements, interest and depth across the ceiling plane — with a kit that consumes minimal space and material.

Efficient Solution: The contoured panels of the unit are high transmission acrylic that provide a low-brightness glow, with the majority of the light controlled through the center optical element.

Preliminary Specifications

Door Frame: Features positive latching mechanism for easy re-lamping.

Direct Optical Component: High reflectance optical engine delivers main beam focus through the revolutionary Dur-iFlex™ HT diffusing panel. With 93% transmission and 89% haze, the result is extraordinary control and efficiency.

Diffuser Surround: (2) Sloping high transmission acrylic diffuser panels manage contrast and generate soft, even, higher angle luminance.

Reflector: Multi-radii high reflectance white reflector distributes light through both optical elements.

Luminaire Type: Fits most standard recessed lensed or parabolic housings 2X2' and 2X4'

Lamps: 1 or 2 T8 or T5 fluorescent wiring kits available.
